## KNOW ALL YOUR FARM HELP! IS POLICE ADVICE

Undesirable Drifters From Across the Border May be Among Arrivals.

WARNING SOUNDED AGAINST I. W. W.

Provincial Police Prepared to Stop Any Attempt At Violences.

"Keep your eyes open" is the advice given to Alberta farmers and other employers of labor by the men entrusted with law and order in this province. In view of the large number of imported laborers and the acknowledged seriousness of the present war-time situation, a little more than ordinary caution in the way of watchfulness and careful inspection is regarded as advisable, and they who are wise are reminded accordingly. Superintendent Macdonnell, of the provincial police, claims that not enough vigilance has been exercised in the examination of farm laborers coming into Canada from the United States this year, and among some of the prospective farmers are not a few who are suspected of being drifters of a not entirely desirable type. If any of them give evidence of being I.W.W. sympathizers the provincial police are prepared, says the superintendent of the force, to use strict measures with them, and to that end all the policemen throughout the province are on the alert.

There is nothing to be alarmed about on the score of these imported workers, so far as the evidence already in hand goes to show. It is merely that property owners would do well to be on their guard, to satisfy themselves beyond doubt of the reliability of their employees, and to use every possible precaution in the way of watching around their premises day and night. With so much depending upon the results of all kinds of production this year, it is felt to no time for running risks, and there having already been a number of unfortunate losses in one way and another it would pay best, it is now pointed out, to be a little more than usually cautious.

A chain of fires that have occurred during the last summer in and around the coal mines of Alberta are a case in point. These fires have included the Pembina, Cardiff, Twin City, Humbertown, and Pacific mines, and the losses have in the aggregate been considerable. How they came to be has never been fully learned. On Wednesday of this week a \$200,000 fire took place at Bellvue, a mining camp in the Crow's Nest, and although the mines themselves were uninjured the village was practically wiped out. In all these cases incendiary origin has been suspected. There is no certain evidence that the suspicion is correct, and to give the aliens all the benefit of the doubt the cause may have been negligence or inefficiency on the part of the mining companies or their working staffs. Nevertheless, the provincial mine branch has sent out a notice recommending to all mine companies that they put on regular staffs of watchmen, and it is understood that some of the largest have taken the advice and are now keeping one or more men steadily on the job. The provincial police have no information pointing to the operations of alien enemies or suspected I.W.W. agitators, but they

too, are keeping on the watch. Another possible source of danger and loss that affects the farmer as closely as the fires at the mines affect the coal industry is incendiary fires in the harvest fields. Nothing of the kind has happened yet, so far as information is available, but Alberta farmers will do well, it is thought, to take note of what has already occurred across the line, where in some parts of Washington State continuous fires in the fields have interrupted harvesting operations and given strong coloring to the view that an enemy's hand has been at work. On one farm, it is reported, nine fires were extinguished in an hour and a half. Matches hidden in the shocks of wheat have been found in other cases, and the inference is that German sympathizers have been taking this means of destroying some part of the Allies food supply.

Alberta farmers who have taken on the services of imported harvesters have no reason, as yet, to get excited about it, but it will be the part of wisdom for them to make sure of their men, just the same.

### New Firm to Sell Ford Cars.

In this issue you will see the advertisement of a new firm and business at Irma. J.W. Wyatt of Jarro who is coming to Irma to manage the new elevator, and W.B. Peterson of the well known firm of Stewart & Peterson have formed this new firm of Wyatt & Peterson and have secured the agency of the Ford cars from Range 8 to Range

12 along the G.T.P. taking in the towns of Irma, Jarrow and Kinsella. Their office and warehouse at present is in the building east of Tripp Livery Barn and formerly used by the Edmonton City Dairies who will be used until spring when a large new garage will be erected and a full line of automobile accessories will be stocked and a first-class mechanic will be secured to take care of the repair and service end of the business, which part of the business will be given special attention. With the rapidly increasing number of cars in the Irma district this feature will be appreciated by all car owners.

One carload of six cars was unloaded last week and Mr. Wyatt reports that only one car is left of this shipment, but that another shipment is expected this week. We join in wishing success to the new firm.

### RED CROSS NOTES

Mrs. Crocker, the local Sec-Treas wishes to acknowledge receipt of the following donations: Mrs. Clark, \$1.00; Mrs. McGregor \$2.00 Mrs. G.N.C. Higginson proceeds from sale of flowers 1.35. Another supply of sewing has arrived, ladies wishing to help with the work should apply to Mrs. F.W. Watkinson at Irma.

### FOOD CONTROLLER'S ADVICE

Following are the suggestions put forth by Hon. W.J. Hanna, Canadian Food Controller:

1. Use perishable foods. Save garden truck that has been produced so abundantly this summer. Preserve, dry, can and store.
2. Eat more fish.
3. Substitute other cereals for wheat products—cornmeal, buckwheat flour, rice flour, and above all oatmeal.
4. Don't throw good food into the garbage can. \$50,000,000 is wasted every year in this country by carelessness in the kitchens.
5. Preach once more the good old fashioned gospel of the clean plate. Do not let children waste food at their meals. Do not waste it yourself.
6. Organize. Various women's organizations are already active. Their leaders will tell you what to do. Get in touch with the workers in your own district.

Another Irma Casualty. A wife has been received officially reporting that Mrs. Fenton Nash No. 231784 had been wounded by gun shot in her right arm and had been admitted into the general Hospital, Connaught.

### Review of the Week in Locals.

A courtesy appreciated by your guests is to have their visits mentioned in the locals. Write to us to go away your friends will be interested to learn of your visit through this page. Send them to us as well as other items of news value.

Born—to Mr. and Mrs. C. C. King on Tuesday last a daughter.

Willard Edwards has resigned his position at the Co-op and gone to the harvest fields.

The cutting in this district is nearly finished and everything points to a pretty fair harvest.

H.W. Love is building a house on Block B. Mr. Beaton is doing the carpenter work.

Mr. Burkholder of the Farmers Elevator has received a wire instructing him to buy grain.

Rev. A.W. Coone of Edmonton representing the Alberta Social Service League will speak at the church services next Sunday.

Miss Clara Saunders has arrived from the east and after spending the week-end at the McKay Ranch took up her duties at the Irma school last Monday.

The new elevator is nearly finished. Mr. McDougal's gang intend going to Heath to build another elevator as soon as this one is finished.

Miss Helena Flett has returned to Edmonton to resume her duties at the Alexandra Taylor school having spent a pleasant vacation at the McKay ranch.

The wet weather the first part of the week will delay threshing for some time. Several outfit had intended to make a start this week.

Next Sunday a number of motorists intend visiting the Buffalo Park. Everyone having a motor is invited to join the party which will leave Irma about 10.30 A.M.

The incessant rains have stopped most of the autos for the time being. Some of the few who braved the mud had narrow escapes crossing some of the new grades which are very slippery and in some places none too wide.

It was a merry crowd of children and grown-ups that invaded the hospitable home of Mrs. John Watson last Friday afternoon. The little ones romped and sang songs till the time came for the good things to be passed around. It was a highly pleased little coterie of faces that arranged themselves in a circle to enjoy the dainties passed by the hostess and her willing helpers. "Uncle Willie," in his own genial way, braving feminine skirts and winsome smiles, helped to make it a day long remembered by the little girls.

The dining room was gorgeous with the early autumn bloom of sweet peas and pansies, where the dining table was laden with so many delicious dishes. About thirty-five guests sat down and enjoyed the gossip over the tea-cups. Toward the close a sprinkling of gentlemen was noticed in the merry crowd. It was a bright, bantering time that held till the shades of evening proclaimed it time for the little groups noticed sitting here and there to break up, all too loath to have such a pleasant afternoon come to a close.

### Another Irma Casualty.

A wife has been received officially reporting that Mrs. Fenton Nash No. 231784 had been wounded by gun shot in her right arm and had been admitted into the general Hospital, Connaught.

### Irma Methodist Church.

Sunday school at 11 a.m.

Preaching service at 7.30 p.m.

In the Battle Heights school house a service will be held at 11 a.m., and in the Sunny Brae school house at 2 p.m.

### The Ladies Aid.

Will meet on Wednesday Sept. 12 in the Irma Church. It is desired to send a box to each of the local boys at the front. Boxes to contain 1 pair stockings, 2 handkerchiefs and chewing gum. Ladies willing to contribute please bring boxes to the meeting or send them to Mrs. Hockin.

## FORD CARS

"The Old Reliable Car"

All other makes of cars advanced from \$75.00 to \$250.00 per car on August 1st. The FORD Car advanced \$14.00 which was in freight charges. Prices are uncertain.

## FRUIT FRUIT

For Saturday we will have a large shipment of

### RIPE and GREEN TOMATOES

CRAB APPLES, PLUMES, PEACHES, CUCUMBERS, APPLES, ETC.

Prices are a lot lower than they have been this season

IRMA CO-OP CO. LTD.

## AN "S.O.S." CALL FROM FRANCE!

Thousands of wounded and old French peasants are trekking their way back to their former homes in the recaptured portions of France only to find them laid waste in the wake of the ruthless Hun. They are penniless, dejected and destitute. They are calling to their Central Western Canada Allies and to YOU for immediate help. Will their voices be unheard?

### French Wounded Emergency Fund

(Under the Authority of the French Government)

President, H.R.H. The Duke of Connaught

This fund was founded to render emergency relief to destitute and suffering dependents of French soldiers—to succour the wounded and to rehabilitate families in the recaptured and devastated portions of France

Your Money is Needed Urgently to Alleviate the Distress and the Suffering in the Districts Being Retaken in the Allies Advance

THE FIRST APPEAL CLOSES SEPTEMBER 17th

Give! Give Generously! Give Today!

Where is there a person in Central Western Canada who would not give willingly to provide provisions, kitchen utensils, tents, etc., etc.? Contributions can be made to any bank. In towns where there is more than one bank, a banking committee will be formed in the interests of the French Wounded Emergency Fund, who will forward all contributions to

**Your Eleven Acres****One Person Must Live Off the Production of Eleven Acres**

The earth has a trifle less than 17,000,000 square miles of total surface. A little over a fourth of this surface is land, or 55,000,000 square miles. Of this 28,000,000 square miles, or a scant fraction over one-half, is soil that can be used for food production. The rest is desert, mountain range, and polar regions: A little more than half possibly be reclaimed, but not very easily.

So here we have two vital facts in the practical geography of today: There are 1,600,000,000 people on the earth to feed, and 28,000,000 square miles of land to grow on. The same, Mrs. Motherwell too intimated that so far as one member of the government could pledge his government, he would assure the Western Canada Irrigation Association convention, "President Motherwell made reference to the apparent advisability of amalgamation of the International Irrigation Congress and the International Irrigation Association. Dry farming and irrigation are simply different methods of providing moisture to the soil and the problems of the dry farmer and irrigation farmer are not the same."

Resolutions adopted by the convention called on the government to

the purpose of regulating irrigation in the territory affected.

Thousands of mothers can testify to the virtue of Mother Wom's Worm Exterminator, because they know from experience how useful it is.

**France Now More Glorious****Also Stronger Than When Conflict Started, Says Minister of War**

Military, the general extent of progress, actually, has been morally wounded by war itself. This summarizes the progress of the last three years, according to Paul Painlevé, the French minister of war, in reviewing war conditions. Minister Painlevé's summary follows:

"Three years of war!—Imagination at first conjures up mourning and demonstration. However, we dare to say that humanity has progressed during these three years. The great enemy of all progress, militarism, has really been wounded morally by war itself. The ideal of the nations of peace expresses itself very precisely against the brutality of nations at war. France has gained little by losing throughout the war, despite the vicissitudes this ideal will triumph."

"While the curve of German force has been falling, the curve of the allies has risen year by year, and the entrance of the United States into the war has given it a sudden and formidable impetus. Germany's fate is determined."

France, however, particularly, can show with elation, particularly, the last three years. Bleeding still invades, she is not only greater and more glorious, but she is stronger militarily and politically than on Jan. 1, 1914. Germany, the source of its hegemony, ruined by its commerce and reduced to an alliance with several groups of adventurers, today compares itself to France, it will show what three years of war have cost it."

"Great work, old top! You stopped the car instantly when you saw the child."

"Child! What child? I saw a blood-swan waving to me from a window—was that all she meant?"

**Amalgamation Of Irrigation Bodies****Project Is Advisable, Says President At Close of Convention at Maple Creek**

In his closing remarks before the Western Canada Irrigation Association convention, President Motherwell made reference to the apparent advisability of amalgamation of the International Irrigation Congress and the International Irrigation Association. Dry farming and irrigation are simply different methods of providing moisture to the soil and the problems of the dry farmer and irrigation farmer are not the same.

**Awful Plight of French Peasants.**

So much has been said of Germany and the Germans that the mere sight of the word "German" in cold print makes one feel inclined to pass along to a happier reading, but not without experiencing a cold shudder. Fortunately there are but few people left in Canada today who would openly put forward a plea for Germany on the grounds of learning and culture. This number would rapidly diminish were they given the opportunity of paying a visit to the western front to see for themselves the utter destruction the retreating German forces have left in their train. With all hope of victory gone the Hun seemingly puts himself out to village, burn and absolutely destroy every piece of territory he occupies previous to evacuation, believing, presumably, that the unchanging sight of wanton destruction will so depress the heart of his enemies as to force an earlier peace. Harrowing narratives of German barbarity are published in "The French Wounded Emergency Fund Magazine," accounts which fairly take one's breath away. It discloses beyond doubt that the plundering and burning of French towns and villages is premeditated and is part and parcel of the German military programme. In this war-striken area only the aged, weak and babies in arms are left by the Huns to grapple with an unknown future, with not even a vestige of a house standing in the whole shell-torn area. The able-bodied men and women (boys and girls of 14 years and upwards) have been deported to Germany—literally forced into bondage. But what makes the saddest reading in the unfolding of one's heart are the stories of this

war is the reference made to the young women who are left with Boche children in their arms to share the fate of the old and decrepit as if to remind them through life of German lust and tyranny. What a future for these poor unfortunate! The finger of scorn is even now pointed by the more fortunate progeny who will be expected to rebuild the future destinies of France. An appeal for money is now being made in the newspapers in behalf of The French Wounded Emergency Fund. This society was founded to render emergency relief to destitute and suffering dependents of French soldiers—to succour the wounded and to rehabilitate families in the recaptured and devastated portions of France and has as its patron H.R.H. the Duke of Connaught. The French Wounded Emergency Fund follows every advance on the Western Front, and endeavors to instill a ray of hope in these poor people, who are almost too numbed with suffering to realize they are no longer under the heel of the oppressor. It is entirely independent of any other organization and looks to charity for its support. It is under the authority of the French Government, and is the only organization undertaking this particular work of restoration. Judging from the names of the prominent people in Winnipeg and Western Canada who have identified themselves with the appeal for funds, a large measure of success should attend the effort. It is worthy of the support of every true citizen and it is to be hoped that a bumper sum of money will be realized. One thing certain: We must one and all now acknowledge the fact that "we must give something."

**Conscription Becomes Law**

The conscription bill has now become law and men between the ages of 20 and 34 will be called before exemption boards at different points in the province within three weeks. These boards will decide who shall be drafted as soldiers in the Canadian army.

**JARROW**

R. O. Moore shipped a carload of steers to Winnipeg.

Charles Prather has gone to Kilham to work.

The ladies aid will sell ice cream for the Red Cross next Friday and Saturday.

Carl Ahlf is planning a new house on his land recently bought from the C.P.R.

Mr. Jackson's sale in Jarrow last Saturday went off very well.

The box social held in Jarrow some two or three weeks ago cleared \$44.50, the boxes selling very reasonable.

The ladies aid meets at the parsonage the first Wednesday in September to quilt a quilt.

George Lubricant is having some building work done for him and Henry Kaesen is planning a fine new residence.

Matt Lockhard, the "pioneer blacksmith," is going into the cattle business on a large scale north of town.

Crops here are good. The rains in August helped considerably. Oats are short but wheat is going to be more than an average crop. There has been no frost to hurt.

**KINSELLA**

C. J. Smith, manager of the Crushed Stone & Gravel company's stock farm here, sold twenty-three head of fat steers last week.

J. Seudder arrived last week from Great Falls, Montana, to look after harvesting the crop on the Stomnick farm. He just had it nicely cut and stacked when 500 head of range cattle owned in Tofield broke in and did great damage. Warned by the loss of the Stomnick place the owners of the neighboring farms were forced to keep a day and night guard over their crops, as no ordinary fence will stand the assault of so many range cattle when once they taste the fruits of victory.

The owners of the cattle have up several quarters of vacant land by utilizing the G. T. P. fence and the Big Grattan lake for a range, but in doing so they have merely left gates for the road allowance and have included several small farms in their range. They not only lost their former hay lands and pasture, but are subjected to loss from cattle breaking in.

Varying crop reports continue to come in, due largely to the narrow streaks of country which did not share in the August rains. Thus one farm cancelled its twine order, whereas two miles away the crops are extra good requiring three pounds of twine to the acre. T.W. Turner reports heavy yields on breaking, but poor yield on summer fallow, due, he thinks, to the late frost in the spring which set back the wheat and allowed the weeds to get a start.

**Coal Springs**

Emil Lindquist has completed a job of plastering for Mrs. Haugan.

Mr. and Mrs. C. J. Knudson spent Sunday with Mr. and Mrs. W. B. Steel of Clark Manor.

W. Newell is at present engaged in making repairs on the separator for J.L. Erickson's threshing.

Olaf Larson and C. J. Knudson are putting the Coal Springs threshing outfit into shape for the season's run.

Messrs. Lederle and Harsford have completed their contract for the finishing of the school stable and giving the buildings the necessary coat of paint.

Mr. Hartford is at this writing painting the residence and also the barn on M. T. Knudson's farm.

Rev. Hoverstein conducted services at the school house on Sunday at 3 p.m. in the Norwegian and at 8 p.m. in the English language. A large number were present at these meetings.

We understand that the residents in the vicinity to the west in the district have organized a Red Telephone Company, the object being to bring the electric power to the area.

Extensive Change

Hur Her Pride

Two fair maids met in a shop, and at once began gossiping, in spite of the fact that they were hindering other customers.

"Oh, have you heard about Phyllis?" exclaimed the one in the white-topped boots suddenly.

"No," replied she of the pink plumes. "What has she done now?"

"My dear!"—in tones of horror—"she's broken off her engagement!"

"What ever for?"—in tones of still greater horror.

"She went with her fiancé to a foot ball match, and now she says he got far more enthusiastic over the game than he has ever been about her."

Well Separated

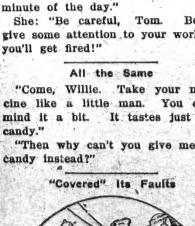

**Business and Pleasure**

He: "Darling, I think of you every minute of the day."

She: "Be careful, Tom. Better give some attention to your work or you'll get fired!"

All the Same

"Come, Willie. Take your medicine like a little man. You don't mind it a bit. It tastes just like candy."

"Then why can't you give me the candy instead?"

**Covered Its Faults**

Author: "How do you like Scribler's new book?"

Boggs: "Well, I think the cover is the most attractive thing about it."

Author: "Then it's 'bound' to sell."

Scandalous

"I understand young Swift has had very checkered career."

"Checkered nothing! That fellow never played any such wild game as that. Peter and I are his favorite music."

# Just Received A New Stock of Phonographs

We have just received a new stock of **COLUMBIA PHONOGRAHPS** and **Records**. The Columbia Phonograph is known to most every one for its tone and clearness. Hearing is believing so come in and see

**Model 21.**

This Machine possesses the musical tone that only the Columbia Machines can produce. **Sizes 13 1-8 x 13 7-8 and 7 in. high. Price \$21.00**

## VIKING

Monday, Labor Day was observed as a holiday by the bank and school.

Mrs. A. O. Omen is entertaining a sister who arrived from Chauvin last Thursday evening.

Mrs. R. Sparling spent the past week in Edmonton as the guest of friends.

Gilbert Beaumont, of Edmonton, was a guest at the W. J. Jones home over Sunday.

Miss McNeil, of Edmonton, is visiting at the Wm. Taylor home this week.

In case Hon. A. L. Sifton goes to Ottawa, Hon. Chas. Stewart is slated to become Premier of Alberta.

C. G. Purvis and H. Rollans spent Sunday and Monday with friends at Sedgewick.

Miss Dornan left on Tuesday for Eye Brow, Sask., where she will enjoy a two weeks' holiday.

Mr. and Mrs. Vern Hardy have returned from a two weeks' vacation spent with relatives and friends at Bawlf.

Mr. and Mrs. A. C. Idyll motorized to Sedgewick last Saturday and spent the week-end at the home of Mr. and Mrs. H. Purvis.

Jas. Hammond, of Tofield, is installing a heating plant and wiring the Jas. Newby residence, north of town, for a Delco light system.

Another telegram has been received here for W. S. Jones stating that J. J. Jones who was wounded some time ago is worse. W. S. Jones has not been located yet.

Forrest S. Johnson of Holden, recently of Scott, Sask., arrived Monday to take charge of the Security Elevator. Mr. Johnson is opening the elevator for business this week.

The attendance at the Red Cross meetings have been falling off lately and it is hoped that all those who can attend the business meeting next Friday afternoon which takes place in the Methodist church.

Miss Ethel Reeves, who has had charge of the postoffice during the absence of Mr. Hilliker, left Wednesday for Edmonton for a visit with the Chas. Brickman family before going to her home at Mannville.

Harry Bell, of the Bulletin staff, Harry Thomas, of the Carroll Wilson Co., and Miss Hornby, of Edmonton, were guests at the Mrs. Grace Dickson home, north of town, Sunday and Monday.

Clem Loughlin, the star hockey player from Winnipeg who played with the Vancouver team last year, is employed by Jas. Newby for the harvest season. Clem is a second cousin of our townsmen, James Loughlin.

Mr. Harper and Mr. Orr of the Kilam bank staff boarded the train here Saturday evening for Edmonton where they passed the Labor day holiday. They motored over with Mr. McKinley, who visited with Mr. Chapman over Sunday.

Steve Jones and family and Miss Anna Jones motored to Edmonton Saturday. They were accompanied home on Sunday by Miss Amy Watkins who is enjoying a vacation at the home of her mother Mrs. Watkins, east of town.

Word was received last week by Mr. and Mrs. T. H. Stowe that their son, Lieut. Geo. Stowe, who left with the 202d battalion this spring for "somewhere in France" has been wounded. The extent of the wounds were not given in the telegram but it is hoped that they are not serious.

The annual meeting of the Viking Curling Club was held in McAthey's real estate office last Wednesday evening. A. O. Omen was re-elected President, A. A. Long Vice President, and H. B. Collier, secretary-treasurer. Some discussion took place about enlarging the rink to two sheets of ice, but it was decided to repair and put the single rink into first-class condition and not to enlarge it. The annual fee remained the same as last year, \$10. Messrs. Omen, Long and Shulvick were appointed as a building committee to attend to the work of remodeling the rink. A proposal to light the rink with electric lights is before the club.

## CANADIAN "V.C."

PRIVATE WILLIAM JOHNSTONE MILNE, of Canadian Infantry, a tall, thin, dark-haired youth, who was awarded the Victoria Cross for capturing two machine-guns, killing the crew of the first and putting out of action the crew of the second.

## RUSSIA'S OFFICERS

How Difficulties in Securing Suitable Material were Overcome

In spite of the confusion and dislocation which followed the peace with Japan, by reason of the return and incorporation of the Manchurian and the Western army, and also because of the political disorders of the day, yet important military reforms were made in Russia. The two great weaknesses of Russia in face of Germany were the inferior character of her officer corps, morally, educationally and technically, and the want of her own system. An officer corps is the growth of time, and needs corresponding classes in the nation to provide its personnel. The Russian and Hungarian classes of Western Europe, founded by the tradition of feudal times and inherited ideas of military honor, contribute young men competent to officer troops. But Russia very little has such numbers of such families in proportion to her vast population. To find competent officers, even for the staff and higher commands, is to recruit from abroad. The 6,300 edition of a London paper was handed to him. The explanation was: "One of our fellows brought it over with him." This aviator had left Paris for London, and, after a stay in the British Isles before business hours, had been back in France in time for dinner!

## AIRMAN'S NEWSPAPER

Says the Manchester Guardian: We all know that the changes in the wonderful development of travel in the war has brought about, but until peace comes we can have little idea how it will affect ordinary life. When it comes, we shall be told to my a friend who died recently at the Royal Flying Corps headquarters in France. "Would you like to see to-night's paper?" he was asked. "No, I have no time," he said. The 6,300 edition of a London paper was handed to him. The explanation was: "One of our fellows brought it over with him." This aviator had left Paris for London, and, after a stay in the British Isles before business hours, had been back in France in time for dinner!

## FROM BLAZING ZEPPELIN

Jumped and Landed Alive with Coat as Parachute

When the Zeppelin Z 43 was brought down in flames, the bodies of the crew who jumped from the burning airship were found in the neighboring fields. It was learned that three of the men had jumped from the airship, and another had landed on the ground alive. One of them, a warrant officer, had a miraculous escape. He told a petty officer who captured him that he had a device which he had prepared for some sort of parachute. In the last part of the Zeppelin to catch fire, he postponed his jump until the airship was near the ground and righted himself alight, and alighted on the ground. He was walking about when he was captured by the petty officer who was home on leave at the time.

**Collision in the Air.**  
Death from Misadventure was the verdict at the inquest on Lieut. E. R. Mackay and Second-Lieutenant G. S. Raine, of the Royal Flying Corps, who were killed when a Zeppelin airship, which had been flying at 10,000 feet, ran into another 300 feet up in the air. The second machine, after being twice righted, came into contact with an airship, and fell to the pilot, Lieutenant W. G. Potts, being injured.

**Honors for Bravest Nurse.**  
Military Nurses were accorded the funeral of Miss Constance Mary Hodges, a London girl who had died in a military hospital in the town. Miss Hodges, daughter of Col. Hodges, Dorking, had a medal for work in Louvain.

**For War Wounded.** An aged soldier's body was found in a London street, having been dead six weeks. He

## MAID MARJORIE

BY L. G. MOBERLY

WARD, LOCK & CO., LIMITED  
London, Melbourne, and Toronto

(Continued.)

"I don't believe I am afraid of being badly treated," Meg answered easily. "Why should anybody treat me badly? If I do my work properly there is no reason why my mistress would be hard to me. And I can't imagine that any woman would treat another one badly" for no reason. I am not going to let myself think for a moment that unkind treatment is even a remote possibility. I have always been made happy by the way now good everybody has been to me. I seem to find love everywhere!"

"Because you carry love everywhere," Miss Penny exclaimed. "You are such a loving soul. Somebody who loves such others must be very much indeed, you are such a happy, loving soul. The love and happiness in you seem to him over and make other people loving and happy."

"I wish I knew something about you," Meg said. "A shadow crept over Meg's face. 'I had the slightest idea that I was or where I came from, how glad I should be. I wonder whether anywhere in the world I have a relation. I should think I must have just one, somewhere."

"It is curious that, in all these years, no one has ever claimed you."

"No one has ever made the least atom of claim to me. Nobody seemed to want me! And I am never likely to learn the truth now, because Mr. Dan did not tell me that he had no answer to any advertisements. Nothing is likely to turn up after all this time. You see, the tiny clues I possess are so very small—so small indeed that I did not tell Mr. Dan about them. In the advertisements, they produced no result. I have just got a small prayer book which was in my pocket when I came here—and this locket." She took from within her dress a gold locket on a chain, and opening it, showed it to Miss Penny, as she had often done before, the face of a laughing girl whose brown eyes were oddly like her own, whose face closely resembled hers. Under the picture was the one word "Mother."

"I hope she is my mother," Meg said, wistfully. "I should think she must be and I should like to believe that she is. She is so sweet and lovely, and she looks like me. My prayerbook was hers, or whether it belonged to somebody else. It has some words written on the fly-leaf, 'May from Mother, Penders Bar.' I don't know who May or where Penders Bar is. But I always hope the book was my mother's. I like to think so, and when I take it to church I always make up my mind it was hers."

"Perhaps some day you will find out all the truth about me. You could not be left in ignorance all your life. Surely something must eventually be discovered, possibly in a way you are not in the least thinking of now. I do very much hope you will find out everything about yourself and me. I have a idea has suddenly come into my mind. Mrs. Carbury, whose children I teach, was telling me only two days ago about a friend of hers who is trying to find a man for her daughters. I told Mrs. Carbury, 'I don't think I did not think very much of the matter, as I knew of no maids, but now I cannot help wondering whether the world may not be exactly what you want. I might be wrong, but for you to inquire about this place, for so sooner you leave here the better. Don't you agree with me?'

"Yes, I know I had better leave soon," Meg answered, "but—do you think—though I haven't learnt typewriting, I could do a good maid? I don't mean to say that I am ashamed of doing maid's work. I am hot. I don't mind what work I do; only secretarial work would be interesting. I have often written things for Mrs. Dan."

"I think if I were you I would not take work as secretary," Miss Penny said, looking earnestly at the lovely, wistful face, then looking away again; "I fancy you might find there are many more difficulties in a secretary's work than in that of a lady's maid. The world is such a queer, wicked place."

"Is it?" Meg smiled. "So far I have only found it a kind place; everybody is so good to me, I haven't met with much wickedness yet."

"Keep your innocent soul and your good heart, and you will always find kind people. I believe that what we find in the world depends a great deal on what we bring to it." Miss Penny spoke earnestly. "Never forget what I told you before. True begins love, and love begins true. You will never, never will forget it, because love is in the centre and the heart of your own loving nature."

"Keep your innocent soul and your good heart, and you will always find kind people. I believe that what we find in the world depends a great deal on what we bring to it." Miss Penny spoke earnestly. "Never forget what I told you before. True begins love, and love begins true."

"Report to the hospital for examination, sir," was the prompt reply.

Absorbing Powers  
Of Dairy ProductsCare Should Be Taken to Avoid  
Spoiled Milk

Dairy products may well be compared to a sponge in their ability to absorb. Just as readily as the sponge takes up water, so milk and butter take up odors and flavors. This is why it is best to wash before or after the milk was drawn.

Good hay and grain are said to produce good milk. This is because the odors are desirable and not objectionable in the product. Carrots, onions, and a number of other vegetables on the other hand have strong characteristic flavors which over come the natural flavor of the milk. Certain vegetables, growing in the Alps mountains, are said to have a particularly spicy odor and flavor to the milk of Swiss cows. Weeds taken into the cow's stomach will be noted plainly in the milk of your cow if she has eaten especially noxious plants.

Any strongly flavored food is liable to make itself evident in the products of the animal.

If you keep your milk if it is left standing in the stable for any length of time, it will absorb the various odors and flavors of the stable or feed. Milk set away in cells where fruit or vegetables are kept will readily take up their flavor.

It is best to keep the milk absorbed and the hardest to get rid of after they have once left their taint. Almost anything which has a peculiar odor or flavor will affect the milk in the condition of any dairy products with which it comes in contact.

The only sure way of having an

untainted product is to feed only flavored feeds and keep the stored products at all times in sweet smelling places free from odors.

C. A. G.

## The Woolwich Arsenal

As against the 10,000 workers it kept going in peacetime, the Woolwich Arsenal now employs 100,000—a number which is growing still—and as this influx of population to the district demands a proportionate increase in the number of houses, the authorities have been compelled to concentrate all this labor and keep it at the fullest pitch of efficiency has been nothing short of superhuman.

Those words of the handmaid buzzed back into Meg's mind as she listened to Mrs. Tredway's refined voice speaking in drawing, insolent tones.

The boudoir in which the lady had

received her was a very small room, overcrowded with furniture, and shrouded in that Cimmerian gloom in which the dwellers of the more fashionable quarters of the city are wont to live. Large curtains hung over the windows, almost completely shutting out such light as was not already obscured by tall houses opposite; silk curtains in a shade dull light, and further emphasized the gloom; and the chairs and sofa were upholstered in a chintz over which large flowers struggled, and large birds flew—a pattern which helped to dwarf an already tiny apartment. The walls were covered with a truly heterogeneous description; upon the mantelpiece were various small articles of bric-a-brac, no one of which appeared to have any particular connection with any other; and the room was heavy with gold and perfume, the scent of some perfume Mrs. Tredway affected, and of great bunches of lilac in a vase on the table.

(To Be Continued.)

Christian Civilization  
In Manifest Peril

From an Address by Robt. Lansing, U.S. Secretary of State

My friends, I firmly believe that the independence of no nation is safe, until the military despotism which holds the German people in the hollow of its hand has been overthrown.

Appeals to justice, to moral obligation, to honor, no longer avail with such a power. There is but one way to restore peace to the world, and that is by becoming German, and that will be found at arm's length. For its own safety, as well as for the cause of human liberty, this great republic is marshalling its armies and preparing with all its vigor to aid in ridding Germany, as well as the world, of the most ambitious and unprincipled autocracy which has arisen to stay the wheels of progress and imperil Christian civilization.

A Smart Recruit

The officer of the day, during his tour of duty, paused to question a sentry who was a new recruit.

"If you should see an armed party approaching, what would you do?"

"Turn out the guard, sir?"

"Very well. Suppose you saw a battleship coming across the parade ground, what would you do?"

"Report to the hospital for examination, sir," was the prompt reply.

## Canned Chicken

How to Can Chicken for Winter Use  
by the Straight Pack Method

"Canned chicken" may be made at home in your own kitchen out of old hens that ought to be killed any day.

The method of operation for what is known as "straight pack" by the trade is very simple, and is given in detail below by Mr. Robt. Lansing, of the meat and canned foods division, health of animals branch, department of agriculture, Ottawa.

Clean and cut up the chicken, sort out the fleshly portions, such as the legs, wings, etc.

Break off the protruding portions of the bones in each piece. Pack these fleshly portions in a glass jar or other container, as closely as possible, and salt and pepper (about one-half teaspoonful of pepper). Fill with the liquid of the chicken, process for preparing which is given below.

For pint jars boil three-fourths of an hour, for quart jars, one hour, for half-gallons, one and one-half hours.

For pint jars, fill the jar with the liquid of the chicken, process for preparing which is given below.

For quart jars, fill the jar with the liquid of the chicken, process for preparing which is given below.

For half-gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ten and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eleven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twelve and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fourteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventeen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For nineteen and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For twenty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For thirty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For forty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For fifty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For六十 and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For sixty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For七十 and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For seventy-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-five and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-six and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-seven and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-eight and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For eighty-nine and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ninety and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ninety-one and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ninety-two and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ninety-three and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.

For ninety-four and one-half gallons, fill the jar with the liquid of the chicken, process for preparing which is given below.
